COLOURS

HI-MACS® solid surface is identical for every colour, although darker hues have a higher percentage of natural pigments,
which need more careful care and attention.
There may be some slight variation in colour between the illustrated and the sample due to printing techniques, colour may vary slightly from the sample.

Alpine White is also available in the special formulations 5728 HI-MACS®-FR (Improved Fire Resistance) and 5828 HI-MACS® UV+ (Improved UV resistance).

- Suitable for exterior use. Please check conditions about level of suitability and warranty per colour.
- Less suitable for surfaces which are subject to high traffic, due to their higher pigmented colour saturation, marks may be seen more easily.
- As Marmo is a randomly veined product, specific fabrication guidelines need to be followed. Ask our sales representative for more information.
- Lucent colours have a higher level of translucency, more evident when combined with light source.
- Colours with this mark have a semi-translucent effect, evident when combined with light sources
- Design Collection by Marcel Wanders
- Contains certified pre-consumer recycled content
